## Safety Organisation

*Monday, 2 February 2009 17:25 (30 minutes)*

Safety has been an integral part both for the installation and hardware commissioning phases of the LHC. The objective of this presentation will be to outline the new structure that is in place, the general organization, introduce the key players, provide an insight into the safety documentation that is available to help everyone, explain what is required to carry out any form of intervention in the underground areas and provide feedback on our strong and weak points.

**Primary author:** ETHERIDGE, John Robert

**Presenters:** ETHERIDGE, John Robert; SCHMIDT, Rudiger

**Session Classification:** Session 02 - Safety
