Pilot Job Frameworks Review news

- MyProxy server built with support for VOMS attributes
  - Will simplify the pilot MyProxy usage for ATLAS and ALICE
    - Allow their pilot roles instead of DN lists as trusted retrievers
  - Rpms have been delivered and tested for SL4 and SL5
  - A workaround was needed on SL4
    - MyProxy was built against VDT 1.10 using system OpenSSL
    - On SL4 we use VDT 1.6 with the Globus OpenSSL
    - Add symlinks in $GLOBUS_LOCATION/lib
      - libcrypto.so.4 → libcrypto_gcc32dbg.so, libssl.so.4 → libssl_gcc32dbg.so
  - Patches were opened for certification
  - FTS team are worried about the workaround
  - SL4 patches on hold
    - Investigation if SL4 rpms can be rebuilt against VDT 1.6
  - Myproxy.cern.ch can be upgraded independently
