

Enabling Grids for E-sciencE

Operational Tools Update

James Casey GDB CERN

www.eu-egee.org

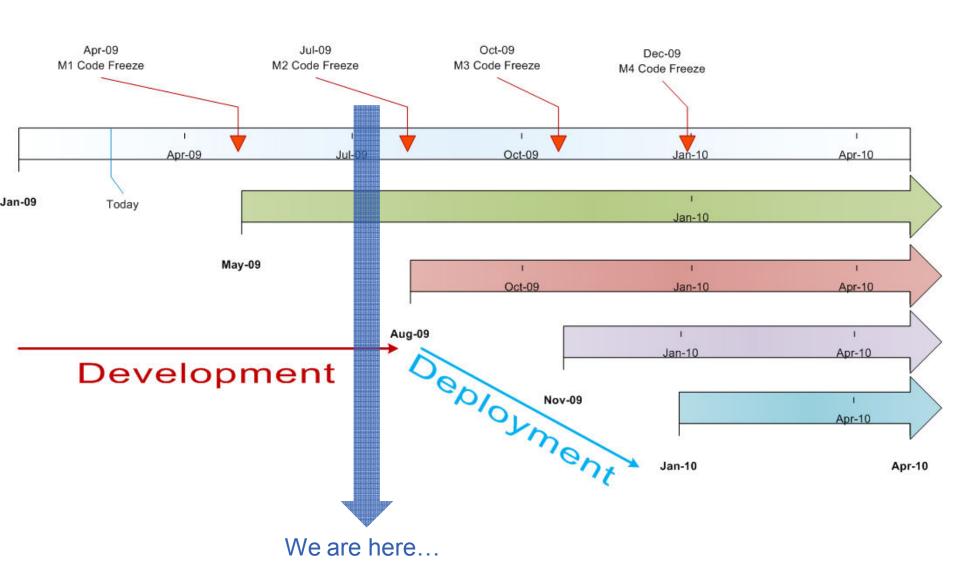

Summary of milestone timeline

Enabling Grids for E-sciencE

M2 Features Highlights – July 09

Enabling Grids for E-sciencl

Regional Dashboard

- 'Regionalized' dashboards interfaced with regional Nagios
- Raising alarms based on Nagios

ROC level Nagios based monitoring available

- Now publishes to new central metric store
- Submission framework fully uses ATP
- Central metric store result visualization (SAM Portal/gridview)

GOCDB

- Write functions for Programmatic Interface (XML over HTTP) available
 - XML over HTTP API available
- Prototype interface to new GOCDB4 available
- First regions deployed communicating with Central project-level GOCDB

M2 Features – July 09

Enabling Grids for E-sciencE

GGUS

MSG interface for ticket submission/update available

Accounting

- Tested ActiveMQ transport with some selected sites
- Patch submitted for gLite certification

QR Reporting Portal (MSA1.3)

- Added reports for operations and user support use cases
 - Some still missing (operations.{1,2}, size.2)

Configuration repositories

Metric Description Database

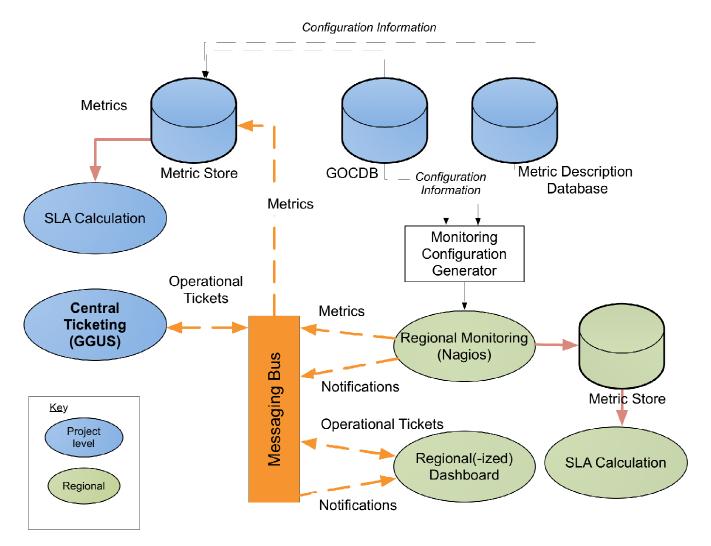

SLA Calculation

Multiple simultaneous availability calculations for a VO

Data flows from Nagios to Regional dashboard

Enabling Grids for E-sciencE

Interactions between EGEE Operational Monitoring Components
