

Pilot Job news

- MyProxy server built with support for VOMS attributes
 - To simplify the pilot MyProxy usage for ATLAS and ALICE
 - Allow their pilot roles instead of DN lists as trusted retrievers
 - SL4 rpms rejected because built against wrong Globus
 - Could be used to upgrade `myproxy.cern.ch` with workaround
 - SL5 client on PPS, server depends on gLite 3.2 planning
- Frameworks
 - ALICE plan for glxec-dependent code in next AliEn release
 - No experiment has done tests since the PPS pilot (~June)
- Deployment of glxec/SCAS has not taken up
 - Glxec still found only on PPS pilot sites
 - Glxec not yet available on SL5
 - Patch #3192 ready for certification
