- **Pilot Jobs, SCAS, gLExec**
- **CREAM**
- **SL5**
- **EGI**
 - Much work on proposal submission by multiple projects
- **Virtualisation**
 - HEPiX Track

GDB

Main Topics Today

- Authorisation
- Middleware
 - SL5 for WN and other releases
 - CREAM
 - Stability for data taking
- ROSCOE SSC
- Experiment Operations

Other News

- LHC Schedule
 - Still on track for mid-November
 - <http://lhc.web.cern.ch/lhc/>
- Scrutiny Group and Requirements
 - Requirements agreed, pledges made to RRB
 - 2009 Pledges should be in place now.
- Alarm Tests for October Successful
- EGEE SLA compliance
 - Sites <50% availability for 3 consecutive months will be suspended
 - 2 sites under threat, not T2s
- Security Patching
 - 2 sites suspended by EGEE for not patching against security exploit

GDB

Authorisation

- The current plan is to deploy SCAS and glEXEC to enable identity switching in pilot jobs.
 - SCAS has been tested and problems fixed.
 - Last GDB there was still an issue with glEXEC on SL5
 - Are we good to go?
- How is Argus progressing?
