

2nd France China Particle Physics Laboratory Workshop - FCPPL2009

Saturday 21 March 2009 - Tuesday 24 March 2009

Huazhong (Central China) Normal University, Wuhan, China

Scientific Programme

The main purpose of the second workshop is to present, review and discuss the various ongoing and future activities performed by Chinese and French scientists within the FCPPL framework. These activities will be put into context by a few review talks at the beginning of each session. Moreover, throughout this workshop, discussions between scientists from both countries will foster and reinforce the cooperation as well as develop further cooperation.

The following topics will be covered in the workshop:

Experiments at LHC, present, future and related theory

Tau, Charm physics, experiment and theory

Computing Grid

ILC scientific program, Accelerator R&D, associated theoretical research

Experimental and theoretical researches in astroparticle and in cosmology
