

# 1972: Raymond, physics in Marseille and an outing in the Alps

I arrived in September 1971 in  
Marseille, Raymond was there.  
Anomalies and renormalizability

June 1972: Marseille conference  
on Yang-Mills. Asymptotic freedom is  
discussed but NOT discovered!!

After the conference I took Raymond  
and his son Olivier into the mountains above  
Arolla. As they believed, for a pleasant walk..

Did Raymond and his son Olivier **EVER** forgive me for taking them into this mess??
