

11th Franco-Italian Meeting on B Physics: New Promising Flavour Physics Research Subjects in Theory and Experiment

Monday, 11 April 2016 - Wednesday, 13 April 2016

LPNHE-Paris

Scientific Programme

The general theme of the workshop is "New promising Flavour Physics research subjects in Theory and Experiment". There will be four half-day sessions, corresponding to the tracks shown below. Each session will have four talks, with the aim of leaving ample time for discussion.

Session 1 - Quark flavour and QCD spectroscopy

Session 2 - Lepton Flavor Universality and Lepton Flavor Violation

Session 3 -Present and Future of existing alternative models

Session 4 -New promising Flavour Physics research subjects
