FDTD Modeling of Temporally Dispersive Media Using a Stable Rational Function of the Z-Transform Variable

Carey M. Rappaport, Maryam Jalalinia, and Emmett Bishop
CenSSIS, Northeastern University, Boston, MA, USA rappaport@neu.edu

Northeastern UNIVERSITY

Abstract:

State of The Art:

Propagation in Dispersive Media in Time-Domain:

Modeling Example:

Stability Analysis:

Stability Example:

Simulation Example:

FDTD Simulation Testing:

Simulation Results:

Conclusions and Future Work:

Popcorn

Conclusions

- Conference rooms are spacious with a big size screen and speakers
- Poster area with industrial exhibitors was very large and well arranged. Poster panels were big enough. However, I felt the organization kind of confusing (but I was only one afternoon…)
- Coffee and Tea (sponsored by Starbucks) were available **only** in the poster/exhibitors area. There were several “coffee pots” but around 15:00 only a few had any coffee on them.
- I noticed also several water fountains around the rooms

Conclusions

- They had free pop corn!!! ☺ next to the coffee
- There were enough tables and chairs in the area but no sofas ☹
- Internet café was well set up but it seemed too small (but most of the people bring laptops anyway)
- Wireless was available in the whole area, so people sitting on the tables had access
- I heard some complaints regarding breakfast
- Also people left their posters rather soon…
