Search for MSSM Higgs boson decaying to a pair of tau leptons in CMS

The latest results of the search for MSSM Higgs boson decaying into two tau leptons with the full 2016 data will be presented. The analysis is performed using the dataset recorded by the CMS experiment at the LHC from pp collisions at centre-of-mass energies of 13 TeV corresponding to an integrated luminosity of 35.9/fb.

Experimental Collaboration

Presenter: WEN, Yiwon (Deutsches Elektronen-Synchrotron (DE))

Session Classification: Poster session

Track Classification: Higgs and New Physics
