Measurements of event properties with jets in CMS

Friday, 7 July 2017 10:15 (15 minutes)

We present results on measurements of characteristics of events with jets, from jet-charge over investigations of shapes to jet mass distributions. The measurements are compared to theoretical prediction including those matched to parton shower and hadronization.

Experimental Collaboration

CMS

Presenter: PASTRONE, Nadia (Universita e INFN Torino (IT))

Session Classification: QCD and hadronic physics

Track Classification: QCD and Hadronic Physics
