## Searches for non-resonant new phenomena in final states with leptons and photons

*Friday, July 7, 2017 10:15 AM (15 minutes)*

Many new physics models, e.g., compositeness, see-saw, and extra dimensions models, are expected to manifest themselves in the final states with leptons and photons. This talk presents searches for new non-resonant phenomena in the final states that include leptons and photons, focusing on the recent results obtained using data collected during the 2016 run.
