The Latest CMS results on Higgs boson decaying to two photons with 13 TeV data

Thursday 6 July 2017 09:30 (15 minutes)

The latest results of the measurement of the Higgs boson decaying into two photons with the full 2016 data will be presented. The analysis is performed using the dataset recorded by the CMS experiment at the LHC from pp collisions at centre-of-mass energies of 13 TeV corresponding to an integrated luminosity of 35.9 1/fb.

Experimental Collaboration

CMS

Author: CMS COLLABORATION

Presenter: PLANER, Michael (University of Notre Dame (US))

Session Classification: Higgs and new physics

Track Classification: Higgs and New Physics
