## Searches for associated production of the Higgs boson with a single top at 13 TeV at CMS

*Friday, July 7, 2017 12:30 PM (15 minutes)*

The latest results of searches for the Standard Model Higgs boson produced in association with a single top quark (tHq, tHW) are presented. The analyses have been performed using the 13 TeV pp collisions data recorded by the CMS experiment in 2015 and 2016.
