Latest CMS results on $t\bar{t}H(bb)$ production

Friday, July 7, 2017 12:15 PM (15 minutes)

Latest 13 TeV results of CMS searches for the Higgs boson produced in association with top quarks and decaying to b quarks will be presented. This talk will include the first CMS results for the fully hadronic channel with the matrix element method as well as the semi-leptonic and di-leptonic channels with the matrix element method and BDT discriminant.

Experimental Collaboration

CMS
