Search for a new spin-zero resonance in diboson channels at 13 TeV

Thursday, July 6, 2017 3:15 PM (15 minutes)

The talk aims to present the most recent results on heavy scalar search in diboson final states (WW,ZZ) combining different final states using full 2016 data collected by CMS detector.

Experimental Collaboration

CMS

Primary author: CMS COLLABORATION

Presenter: MAGITTERI, Alessio (Universite Catholique de Louvain (UCL) (BE))

Session Classification: Higgs and new physics

Track Classification: Higgs and New Physics
