Type: **Poster Presentation**

Searches for exotic Higgs boson decays at CMS

Recent results on searches for exotic production and decays of the Higgs boson $H(125)$ are presented. The current status of the searches for invisible and quasi invisible decays, lepton flavour violation ($e\mu$, $e\tau$, $\mu\tau$) decays, decays to light scalars will be reviewed.

Experimental Collaboration

Presenter: DEV, Nabarun (University of Notre Dame (US))

Session Classification: Poster session

Track Classification: Higgs and New Physics
