xBatch: Extending the CERN Batch Service Into the Public Cloud

Wednesday 20 April 2016 14:50 (25 minutes)

For the last few years, the CERN Batch Service has been exclusively hosted on
our internal cloud service. As procurement for cloud resources to augment the
compute available in our computer centre becomes a reality, we are planning
the extension of the HTCondor batch service into the public cloud. This talk
will provide the initial strategy we are pursuing to configure, provision
and manage public cloud resources, the technical and toolsets choice made,
and the progress we've made so far.

Length of presentation (minutes, max. 20)

20

Author: BELLEMAN, Jerome (CERN)

Presenter: BELLEMAN, Jerome (CERN)

Session Classification: Computing and batch systems

Track Classification: Computing & Batch Services
