Chef@GSI revisited

Thursday, April 21, 2016 2:50 PM (25 minutes)

At Hepix Fall 2011 at Vancouver I gave a presentation about GSI's starting migration from CFengine to Chef configuration management.

This migration was a bumpier ride than initially expected (as usual?).
So now, 5 years later, I'd like to

- take a look back at our intentions for the migration,
- the difficulties we encountered,
- the current situation and issues still to be solved,
- the lessons we learned,
- and the possibilities we still see to improve or workflow with Chef.

Length of presentation (minutes, max. 20)
