

Community White Paper: Charge from WLCG

- ❑ As discussed at June MB by Peter Elmer
 - ❑ NSF funded activity – pre-proposal for a more sustained effort to support effort on core software for HL-LHC
 - A deliverable is a Community White Paper
 - NSF would like to see under HSF umbrella
 - ❑ Agreed that this CWP could also serve as a good roadmap for software-related work that is needed for HL-LHC
 - One of the original drivers for setting up HSF
 - ❑ This can provide a tool for getting engagement of the community in the areas where effort needs to be invested
- 👉 MB invited to approve the charge as a WLCG activity
