

Wrap-up

Thank You

Highlights

- LHC
 - Overview of the LHC upgrades and we learnt, again, that the machine has a challenging R&D and construction programme to deliver in order to allow tuning the delivered instant luminosity to requests from the experiments
- Alice and LHCb
 - Substantial upgrades executed essentially during LS2
- Bulk of Workshop about R&D and construction of ATLAS and CMS electronics upgrades

Highlights

- Generally talks have been clear, well thought through, and useful
- Several talks cover at least ATLAS and CMS and the effort from the speakers should be recognized and is highly appreciated
- In particular
 - Radiation Hardness talk Monday 17h20
 - High precision timing application talk Tuesday 14h00

Common ATLAS and CMS Electronics Systems workshop for LHC Upgrades – Issue 2018?

It appears logical to organize a workshop after
release of the main detector TDRs

Thanks again
