

Projet de recherche

« Optimum Brain Ageing »

Aspects pratiques

Dina Zekry, MD, PhD

Médecin adjoint

Département de Réhabilitation et Gériatrie,
Hôpitaux Universitaires de Genève, Suisse

25 Février 2009

Results of the merged data bases

1. Questionnaire received at home (voluntary basis) Complementary questions

- Life habits: diet, alcohol intake, smoking (...)
- Life events: psychological stress, divorce, bereavement
- Physical activities: jogging, tennis, gardening, ski (...)
- Leisure activities: manual versus intellectual
- Treatments: prescribed or over the counter

2. Request agreement to participate in a baseline assessment

Baseline assessment

Clinical
Blood biomarkers
Neuropsychological
Brain imaging

Comparison with data collected by the CERN medical service*

In any case, your GP would be informed of the results**

3. Subsequent request to be included in the longitudinal study

Longitudinal study

➤ **HEALTHY BRAIN
AGEING**

Control group
versus
Memory training group

**MILD COGNITIVE
IMPAIRMENT**

Control group
versus
Non therapeutic group
versus
Drug treatment group
