

Consideration on C_3F_8 activation

We should look this “feature” from several points of view among which:

- safety, radioprotection aspects → **???? next talk we tell**
- maintenance of equipments **2 – 3 year**
- safety of equipment **next year →**
-

These points weight differently according to the period in time that we consider

safety of equipment

The review on Haug compressors demonstrated that an extra safety factor, for the life time of the compressor, is introduced if the output pressure is reduced

→ Tank/condenser are brought to the surface → START NOW!
