

6th International Workshop on Neutrino-Nucleus Interactions in the Few-GeV Region (NUINT 09)

Monday, May 18, 2009 - Friday, May 22, 2009

Sitges (Barcelona) Spain

Scientific Program

Motivation

Confronting theory, models & data

Electron scattering and its connections to neutrino-nucleus interactions

Current and future neutrino experiments

CC and NC quasi-elastic scattering

Single pion production

Shallow to deep inelastic scattering

The path forward: theory vs. experiments needs

Poster session
