

Low-x

Topics:

- DIS at small x
- Structure functions of p , γ and pomeron
- LHC results on QCD and diffraction
- Problem of saturation
- Diffractive events and the pomeron
- Exclusive production
- Diffraction in l and h induced reactions
- Hadronic final states
- Vector meson production
- Prospects in $\gamma\gamma$ physics
- Astroparticle physics
- Heavy Ion Physics (QGP, saturation...)
- Spin physics at low- x
- Other hot topics (open to suggestions)

Local Organizing Committee

- T. Csörgő (chair) (KRF and Wigner RCP)
T. Novák (co-chair) (KRF)
M. Csanád (secretary) (ELTE)
