

# 2016 CAP Congress / Congrès de l'ACP 2016

## Tuesday 14 June 2016

### DTP Poster Session with beer / Session d'affiches, avec bière DPT - SITE Atrium (19:00 - 22:00)

-Conveners: Svetlana Barkanova

time	[id] title	presenter
19:00	[995] Gravitationally induced quantum transitions	Mr LANDRY, Alexandre
19:02	[1027] Spacetime in Everett's interpretation of quantum mechanics	Prof. MARCHILDON, Louis
19:04	[1262] Scalar fields in a shell: the response of an Unruh-Dewitt detector inside, and what it means for us outside	NG, Keith
19:06	[1156] Super-Entropic Black Holes	MANN, Robert
19:08	[1274] First and second order Viriel coefficients for a gas of anyons	NEBIA, Faïza
19:10	[1154] Incompatibility of Determinism, Independence, and Objectivity	MANN, Robert
19:12	[1030] Random Matrices Approach to Neutrino Masses	GIASSON, Nicolas
19:16	[1039] Paczynski-Wiita-like potential for any static spherical black hole in metric theories of gravity	FARAONI, Valerio
19:18	[1450] A Holographic Model for Quantum Critical Responses	SIERENS, Todd
19:20	[1478] Gravitational Screens as Quasi-local Observers	Mr SIMOVIC, Filip
