

# 2016 CAP Congress / Congrès de l'ACP 2016

## Monday 13 June 2016

### M2-2 Molecular Biophysics (DPMB) / Biophysique moléculaire (DPMB) - Colonel By B205 (13:00 - 14:30)

-Conveners: Francis Lin

time	[id] title	presenter
13:00	[1286] Femtomedicine in Cancer: Discovery of New Antitumor Molecules for Natural Targeted Chemotherapy and Radiotherapy of Cancers	Prof. LU, Qing-Bin
13:30	[1121] Observation of coupling between microscopic diffusion and macroscopic elasticity in soft matter	GALSTIAN, tigran
13:45	[1184] The Lipid Bilayer Provides a Site for Cortisone Crystallization at High Cortisone Concentrations	KHONDKER, Adree
14:00	[1195] Coarse-grained simulations of highly driven DNA translocation from a confining nanotube	SEAN, David
14:15	[1196] Organization of Nucleotides in Different Environments: Implications for the Formation of First RNA under Prebiotic Conditions	HIMBERT, Sebastian
