

2016 CAP Congress / Congrès de l'ACP 2016

Wednesday 15 June 2016

W1-8 Observations In Situ and Remote Sensing I (DASP) / Observations in situ et détection à distance II (DPAE) - SITE

J0106 (08:30 - 10:30)

-Conveners: Wayne Hocking

time	[id] title	presenter
08:30	[1337] Studying the carbon cycle with atmospheric remote sensing measurements of carbon dioxide	WUNCH, Debra
09:00	[1051] Longitudinal perturbations in thermospheric atomic oxygen concentrations observed at mid-latitudes by the Wind Imaging Interferometer compared with the Canadian Ionosphere and Atmosphere Model	Prof. SHEPHERD, Gordon
09:15	[1157] Spectroscopic measurements of marine atmospheric boundary layer composition in Halifax	Prof. WIACEK, Aldona
09:30	[1400] Trace Gas Measurements in the Canadian High Arctic using Infrared Emission Spectroscopy	TRAN, Sophie
09:45	[1339] Dynamical perturbations of the thermosphere inferred from satellite observations of O(1D) nightglow	SHEPHERD, Marianna
10:00	[1122] Electron temperature anisotropies measured by CHAMP	MARCHAND, Richard
