conCERNed for Humanity invites you to a Forum discussion on:

Information Technology and the Good Life?

Unlike traditional lectures, the format will be a dialog among participants with the help of four short stimulating and engaging texts from renowned authors:

The Technology of Time Management (James Gleick)
"Money can be acquired, saved, and spent. We sometimes act as though we could treat time the same way."
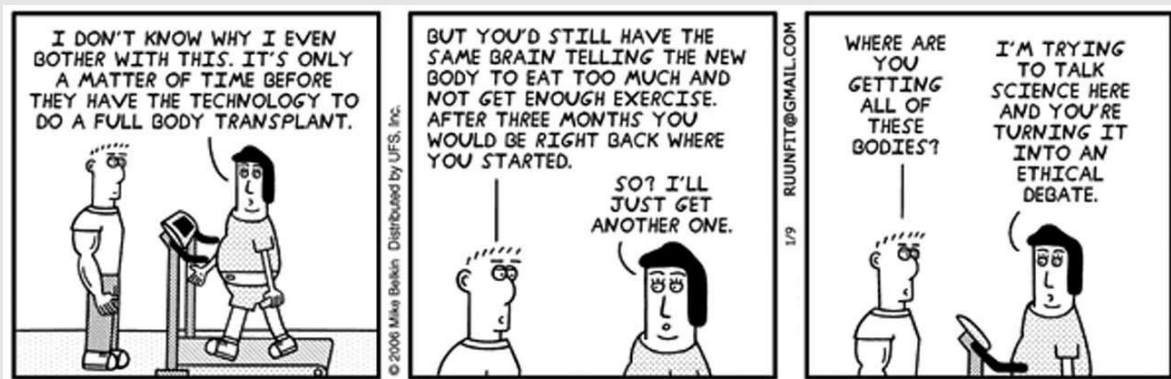

Margin (Richard Swenson)
"Marginless is not having time to finish the book you 're reading on stress; margin is having the time to read it twice."

The Flying Machine (Ray Bradbury)
"New ideas, new concepts and new technology can be exciting and invigorating. But they can also threaten the status quo…"

Why the Future does not need us (Bill Joy, Co-founder of Sun Microsystems)
"The question is which is to be our master? Will we survive our technologies?"

SAVE THE DATE

Saturday
23 January
09:00-12:30
CERN Room C

The discussions will be moderated by Dr. Ian Rutter, Mr. Michel Basse, [*Renaissance Forum*, Geneva: www.therenaissanceforum.org]
Registration:
Mr. Olav Berrig
