

The Status of Calorimeter on CEPC

Tuesday 17 May 2016 14:50 (20 minutes)

After the discovery of the Higgs particle, Chinese high energy physics community has proposed circular electron positron collider (CEPC) as a Higgs factory and the pre-CDR has been released in May, 2015. The pre-CDR design of the CEPC detector will be presented and the status of Calorimeter will be focused.
