Determining Neutrino Properties from Supernova Neutrinos	2
Supernova Neutrino Detection Overview	3
Determining Neutrino Properties from Supernova Neutrinos	3
Supernova Neutrino Detection Overview	3
A Status Report on Core Collapse Supernova Modeling	3
A Status Report on Core Collapse Supernova Modeling	3
Neutrinos and heavy element synthesis	3
Determining Neutrino Properties from Supernova Neutrinos	3

Supernova Neutrino Detection Overview	3
A Status Report on Core Collapse Supernova Modeling: Successes to Date and What Lies Ahead	4
Neutrinos and heavy element synthesis	4
Registration	4
Review on neutrino physics	4
Searching for the neutrinoless double beta decay with a Xenon gas TPC: The NEXT experiment	4
Searches for Dark Matter at Colliders	4
Neutrino4	4
Neutrino5	4
Progress towards barium daughter tagging in ^{136}Xe decay using single molecule fluorescence imaging	5
TBD	5
Determining Neutrino Properties from Supernova Neutrinos	5
Workshop on Supernova	5
Neutrinos and Gravitational Waves from CCSNe	5
Neutrinos as a probe of supernova explosion dynamics	5
Status and neutrino probes of failed explosions	5
Dark Matter at the crossroads: many constraints and some new ideas	6
TREX-DM: a Low background Micromegas-TPC for low-mass WIMP searches	6
Neutrinos and heavy element synthesis	6
Supernova Neutrino Detection Overview	6
A Status Report on Core Collapse Supernova Modeling: Successes to Date and What Lies Ahead	6
Presupernova evolution and explosive nucleosynthesis of the progenitors of core collapse supernovae	6
Summary talk	6
GEM-based TPC optically read out for R&D purposes	7
Caliste-MM : A New Concept of Gaseous Spectro-Polarimeter for Soft X-Ray astrophysics	7
A picosecond Micromegas EUV photodetector	7
LUX results and future prospects	7

NEWS experiment: search of ultra- light WIMPs	7
Latest solar axion results and prospects	7
The WA105-3x1x1 m3 dual phase LAr-TPC demonstrator	8
Prototyping the single phase LArTPC DUNE far detector design	8
MicroBooNE	8
The LArIAT experiment: first measurement of the inclusive total pion cross-section in Ar- gon	8
New TPCs for the upgrade of the T2K Near detector	8
A TPC as high performance gamma-ray telescope and polarimeter: polarisation measure- ment in a beam between 1.7 and 74MeV with HARPO	8
REST v2.0 : A data analysis and simulation framework for micro-patterned readout detec- tors.	8
Cubic sphere for rare event search	9
Directional Dark Matter Detection with MIMAC	9
Status of the XENON1T experiment	9
Panda-X experiment and new results	9
Secondary scintillation of xenon with sub-percent concentrations of molecular additive (CO ₂ , CH ₄ and CF ₄) for HPXe optical TPCs	9
Micromegas based muon telescopes for the ScanPyramids mission: performance and first results	9
Review of neutrinoless double beta decay	10
R&D towards spherical LXe TPC	10
Cygnus project	10
Light Dark Matter search with NEWS-LSM detector	10
XEMIS: a single-phase liquid xenon TPC for 3gamma medical imaging	10
On the possibility of positive-ion detection in high-pressure TPCs	10
ProtoDUNE Dual-Phase	10
Microscopic simulation of Xenon-based Optical TPCs in the presence of molecular additives	11
The Quad: a general purpose modular readout system for TPCs	11
New developments of the spherical detector sensor	11
Session leader: A. Delbart	11

Cubic sphere for rare event search	11

35

Determining Neutrino Properties from Supernova Neutrinos

Corresponding Author: schol@phy.duke.edu

36

Workshop on Supernova

37

Neutrinos and Gravitational Waves from CCSNe

Corresponding Author: giulia.pagliaroli@lngs.infn.it

38

Neutrinos as a probe of supernova explosion dynamics

39

Status and neutrino probes of failed explosions

Corresponding Author: shunsaku.horiuchi@gmail.com

40

Dark Matter at the crossroads: many constraints and some new ideas

Corresponding Author: marco.cirelli@cern.ch

41

TREX-DM: a Low background Micromegas-TPC for low-mass WIMP searches

Corresponding Author: iguaz@unizar.es

42

Neutrinos and heavy element synthesis

Corresponding Author: surmanr@union.edu

43

Supernova Neutrino Detection Overview

44

A Status Report on Core Collapse Supernova Modeling: Successes to Date and What Lies Ahead

45

Presupernova evolution and explosive nucleosynthesis of the progenitors of core collapse supernovae

Corresponding Author: marco@oa-roma.inaf.it

46

Summary talk

Corresponding Author: francis.halzen@icecube.wisc.edu

47

GEM-based TPC optically read out for R&D purposes

Corresponding Author: florian.maximilian.brunbauer@cern.ch

Summary:

48

Caliste-MM : A New Concept of Gaseous Spectro-Polarimeter for Soft X-Ray astrophysics

49

A picosecond Micromegas EUV photodetector

Corresponding Author: thomas.papaevangelou@cern.ch

52

LUX results and future prospects

Corresponding Author: richard_gaitskell@brown.edu

53

NEWS experiment: search of ultra- light WIMPs

Corresponding Author: gilles.gerbier@queensu.ca

54

Latest solar axion results and prospects

Corresponding Author: igor.irastorza@cern.ch

55

The WA105-3x1x1 m3 dual phase LAr-TPC demonstrator

Corresponding Author: sebastien.murphy@cern.ch

56

Prototyping the single phase LArTPC DUNE far detector design

Corresponding Author: m.wallbank@sheffield.ac.uk

57

MicroBooNE

Corresponding Author: mooney@bnl.gov

58

The LArIAT experiment: first measurement of the inclusive total pion cross-section in Argon

59

New TPCs for the upgrade of the T2K Near detector

Corresponding Author: marco.zito@cern.ch

61

A TPC as high performance gamma-ray telescope and polarimeter: polarisation measurement in a beam between 1.7 and 74MeV with HARPO

Corresponding Author: philippe.gros@llr.in2p3.fr

62

REST v2.0 : A data analysis and simulation framework for micro-patterned readout detectors.

Corresponding Author: javier.galan.lacarra@cern.ch

64

Cubic sphere for rare event search

65

Directional Dark Matter Detection with MIMAC

Corresponding Author: daniel.santos@lpsc.in2p3.fr

66

Status of the XENON1T experiment

Summary:

69

Panda-X experiment and new results

Corresponding Author: kgiboni@sjtu.edu.cn

70

Secondary scintillation of xenon with sub-percent concentrations of molecular additive (CO₂, CH₄ and CF₄) for HPXe optical TPCs

Corresponding Author: henriques@gian.fis.uc.pt

71

Micromegas based muon telescopes for the ScanPyramids mission: performance and first results

Corresponding Author: david.attie@cea.fr

72

Review of neutrinoless double beta decay

Corresponding Author: saakyan@hep.ucl.ac.uk

73

R&D towards spherical LXe TPC

Corresponding Author: sekiya@icrr.u-tokyo.ac.jp

74

Cygnus project

Corresponding Author: n.spooner@sheffield.ac.uk

75

Light Dark Matter search with NEWS-LSM detector

Corresponding Author: ali.dastgheibi-fard@cea.fr

76

XEMIS: a single-phase liquid xenon TPC for 3gamma medical imaging

Corresponding Author: lucia.gallego-manzano@subatech.in2p3.fr

77

On the possibility of positive-ion detection in high-pressure TPCs

Corresponding Author: lior.arazi@weizmann.ac.il

78

ProtoDUNE Dual-Phase

Corresponding Author: vgalymov@ipnl.in2p3.fr

79

Microscopic simulation of Xenon-based Optical TPCs in the presence of molecular additives

Corresponding Author: diego.gonzalez.diaz@cern.ch

80

The Quad: a general purpose modular readout system for TPCs

Corresponding Author: vdgraaf@nikhef.nl

81

New developments of the spherical detector sensor

82

Session leader: A. Delbart

83

Cubic sphere for rare event search

Corresponding Author: xavier-francois.navick@cea.fr
