Procedure for giving talks or presenting posters in the name of SHIP at conferences

- Any member of the ship collaboration is entitled to give talks or present a poster on behalf of the SHIP experiment (conferences, funding agencies meetings, local meetings ecc.).
- The SCCP together with the interim Spokesperson will seek for talk/poster opportunities in international conferences by contacting the organizers or following invitations and will take care of submitting relevant abstracts.
- Once a talk/poster is assigned to SHIP the SCCP advertizes it on this web page and on the ship-general mailing list. Any member of SHIP can propose her/himself or a colleague as speaker. In case of conflict, the speaker/poster presenter name will be eventually decided by the interim Spokesperson.
- In order to present coherent and updated information, the speaker/poster presenter is asked to put a draft talk/poster on this page at the appropriate location below a few days in advance to let the collaboration comment. In order to avoid spamming, a mail should be sent to the SCCP to inform him about the draft. Depending on the relevance of the talk/poster, the SCCP will send a mail to the ship-conveners mailing list asking for comments. Comments to the talk/poster from the ship-conveners mailing list should be sent to the authors and to the SCCP in courtesy copy (not the whole list to avoid spamming!), who will check that the comments are implemented.
- Direct invitations for talks from the organizers are considered at this stage a good opportunity or the collaboration. Still, it would be good to follow the above procedure for revision of the talk.
- The official [SHIP](#) symbol should be displayed on each page of the talk. The talk should be possibly give "on behalf of the [SHIP](#) Collaboration", unless the speaker is invited personally to talk about subjects that include [SHIP](#) among other stuff. Please, do not use a slide to "Thank for listening" or so.
- About proceedings: the speaker/poster presenter is asked to put a draft on this page at the appropriate location below a few days in advance to let the collaboration comment. The conveners list is informed and asked for comments. After submission, the proceeding should either committed to CDS ([conveners only](#)) or send to the SCCP to be committed.

10:08 **SHiP: a new multipurpose beam-dump experiment at the SPS.** / [Dijkstra, Hans](#) (CERN) /SHiP Collaboration

SHiP is an experiment to look for very weakly interacting particles at a new to be constructed beam-dump facility at the CERN SPS. The SHiP Technical Proposal has been submitted to the CERN SPS Committee in April 2015. [...]

Conclusion

- 1) Formal structure for conference participation for SHiP well in place and tested**
- 2) Need to understand level of interest in obtaining talks from the groups. Indeed it is not nice to cancel many talks**
