

Validation of CLIC_o3_v5

Rosa Simoniello

CLIC_o3_v5

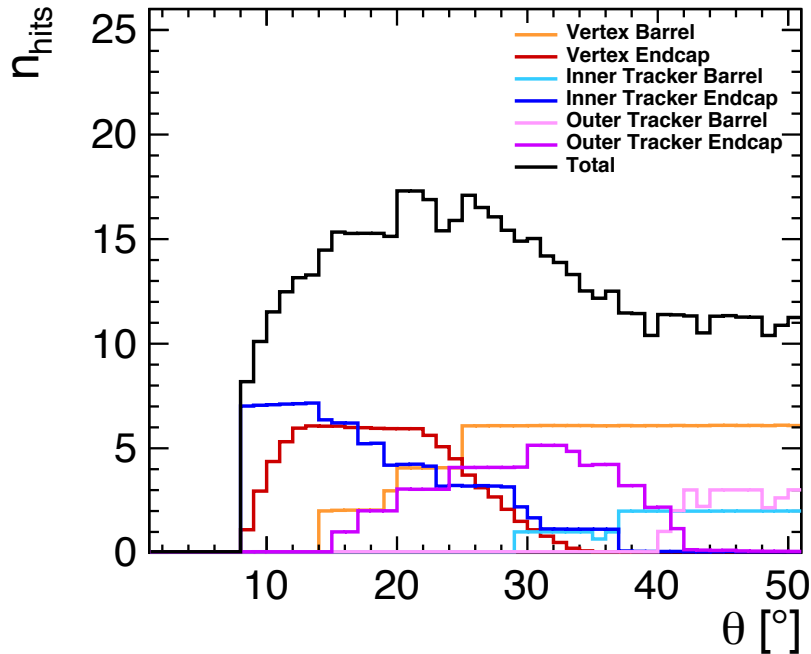

New CLIC_o2_v5 in simulation 😊

- ✓ Tracker from engineer design implemented (*M. Petric from numbers by S. Sroka*)
 - Extra barrel layer
 - Barrel with equal length
 - New support structures (not described in this talk)
- Some material budget numbers need to be updated → interaction with engineers
- ✓ Basic validation of model (+ upgraded software) done
 - Problem with missing hits in the endcap solved
 - Results in the next slides

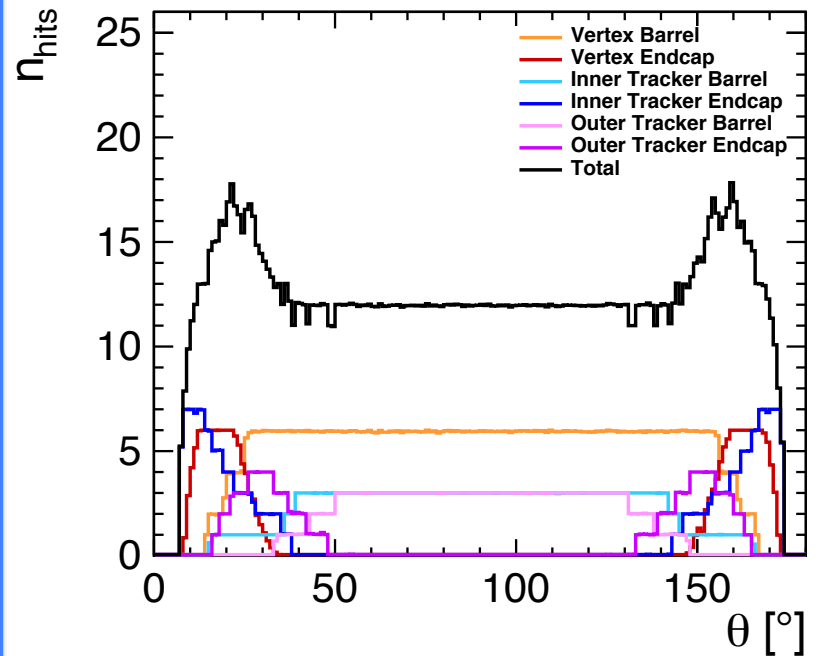

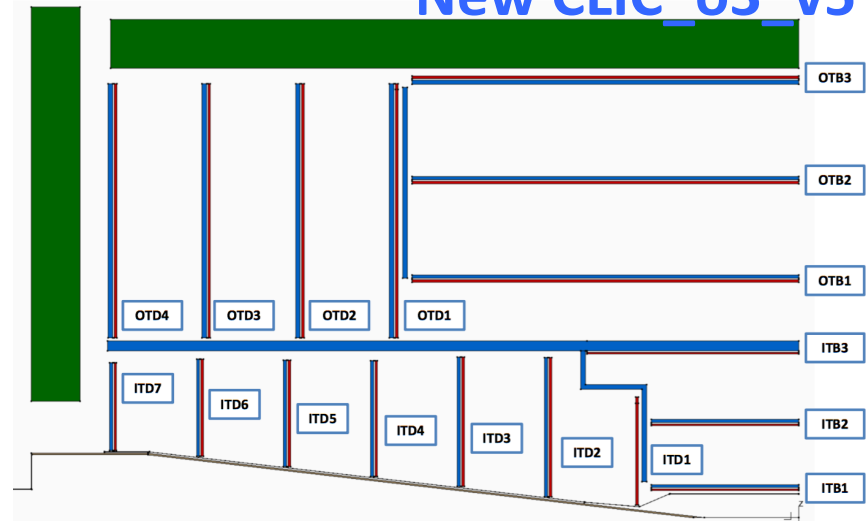

Number of hits

Old CLIC_o2_v3

New CLIC_o3_v5

Number of hits

Old CLIC_o2_v3

New CLIC_o3_v5

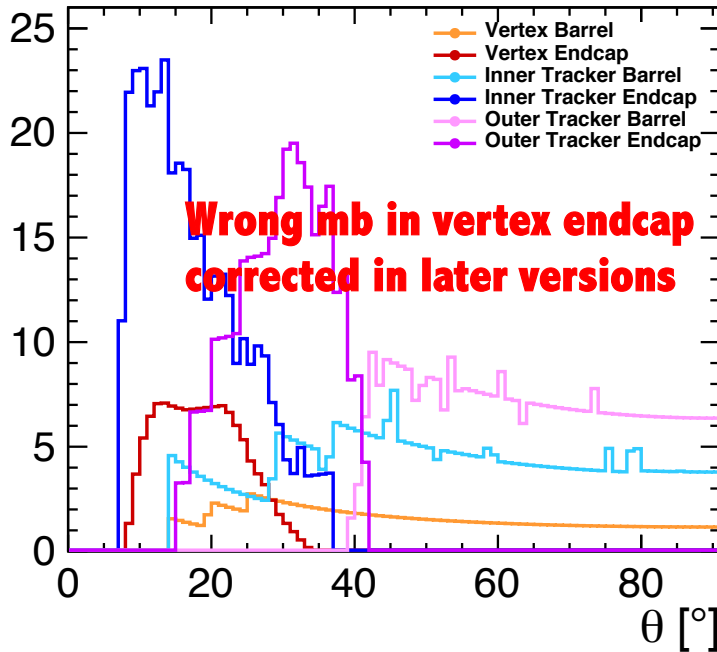

Material budget

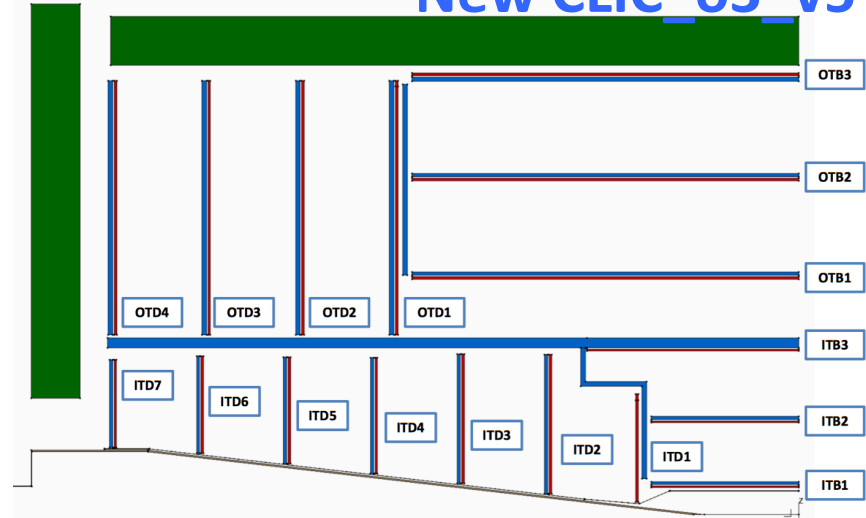

Old CLIC_o2_v3

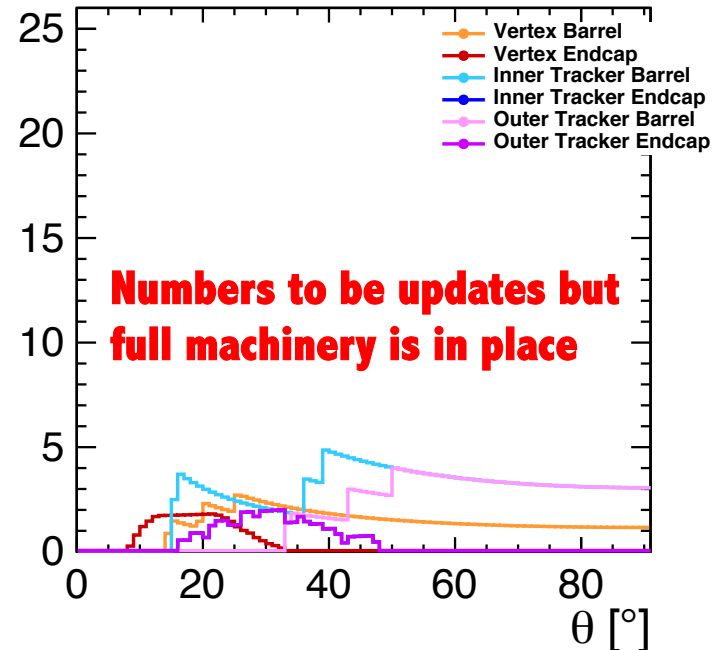

Material Budget [%X₀]

New CLIC_o3_v5

Material Budget [%X₀]

Conclusions

- Basic validation of the new CLIC_o3_v05 model is OK
- More tests and final plots to be produced when all mb numbers are updated
