

Innovation and Discovery

UK Institutional Repository Search

Free, faster and more relevant search for academic and research content

PROBLEM:

Knowledge Challenge for UK Research

- Vast and constantly expanding range of information sources
- Growing area of uncharted “supplementary data”
- Manual metadata overheads restricting dynamic discovery
- Unconnected islands of discovery and innovation

Discovery to innovation for the researcher

- Initial literature review can take months
- Information overload
- Can't expose relationships between information
- Managing discovery relationships within a research team

SOLUTION:

Conceptual Search

Uses Autonomy IDOL software to drive contextually related content, people and communities into virtual research & learning spaces

Text Mining Search

Makes browsing easy as it finds relevant results by clicking on the most important concepts using text-mining techniques, and groups similar documents conceptually

Simple and Advanced Repository Search

Provides free access to over 95 UK institutional repositories, covering approximately 500,000 research artefacts
