

Siam Physics Congress 2017

Thursday 25 May 2017

A10: Astronomy II - Ballroom 2 (11:00 - 12:15)

-Conveners: Maneenate Wechakama; Peera Pongkitiwanichakul

time	[id] title	presenter
11:00	[322] The physical and pulsational parameters of oEA star AS Eridani: results from ground based analysis	Ms GUNSRWIWAT, Khemsinan
11:15	[353] High redshift Quasars selection with deep Optical & Near-IR photometry and Photo-z technique for EoR study	Mr THANANUSAK, Narenrit
11:30	[377] Squeezed bispectrum for multi-fields inflationary model with constant metric in field space	JITPIENKA, Sakdithut
11:45	[378] Disformal coupling between dark energy and dark matter and the dynamics of the universe	Mr SAPA, Stharporn
12:00	[418] Camera technologies overview and Applications in Astronomy imaging	CHEN, Sean
