

# 6th Asian Triangle Heavy Ion Conference

## Wednesday, 17 February 2016

### Session 9: Fluctuations and Correlations - Conference Hall 1 (14:00 - 15:40)

-Conveners: Zhe Xu

| time  | [id] title  | presenter          |
|-------|---|--------------------|
| 14:00 | [55] Importance of separated efficiencies for positively and negatively charged particles for cumulant calculations           | NONAKA, Toshihiro  |
| 14:20 | [47] Search for critical parton density fluctuations through baryon clustering  | ESHA, Roli         |
| 14:40 | [32] Properties of net $\bar{b}$ -baryon number cumulant ratios in the strong coupling limit of lattice QCD at finite density | ICHIHARA, Terukazu |
| 15:00 | [4] Beam energy dependence of specific heat in Ultra-relativistic Heavy-Ion Collisions  | NAYAK, Tapan       |
| 15:20 | [87] Studying Tsallis distribution at LHC energies  | AZMI, M. D.        |
