## Exotic spectroscopy at LHCb

*Tuesday 10 May 2016 17:15 (15 minutes)*

The discovery of the first pentaquark states and the first unambiguous determination of the  $Z_c(4430)$  as a tetraquark state achieved at LHCb in the last years have incredibly increased the interest for exotic hadrons containing heavy quarks. An overview of the recent LHCb results on quarkonium-like hadrons is presented, including a study of the  $B_s \chi_{\pm}$  system
