

Workshop Overview

The design and science cases of novel plasma accelerators are subject of intense studies. Progress in proof-of-principle experiments has led to the expectation that ground-breaking applications of plasma accelerators are to be expected in the next years.

The workshop will bring together the communities of conventional facilities, lasers and novel accelerators, to discuss the unique opportunities from such a design study. The initial EuPRAXIA project team, EuroNNAc network participants and interested scientists will come together to collect input from all parties.

This meeting will be sponsored by INO-CNR, INFN, the European Network for Novel Accelerators (FP7/EuroNNAc2), the European Coordination of Accelerator R&D project (FP7/EuCARD2) and the Horizon2020 EU Design Study EuPRAXIA and is open to all interested parties.

Venue

The workshop will take place at **Area della Ricerca CNR** in Via G.Moruzzi 1, Pisa.

WIFI will be available.
