

CosPA 2016

Monday, 28 November 2016 - Friday, 2 December 2016

Scientific Programme

The scientific programme will cover five days of invited plenary and contributed parallel session talks as well as poster presentations. Wednesday afternoon is left free for self-organised excursions, and a public talk will be scheduled for the evening of Tuesday, December 2. Topics to be discussed at the conference include:

Particle astrophysics

Dark matter and dark energy

Cosmic microwave background and large-scale structure

Inflation and early universe cosmology

Gravity and gravitational waves
