

# Exotic Higgs Decays meeting

DAY 1

# Discussion

- LHC HXSWG exotic Higgs working group: how can we help?
  - presentation of results?
  - parametrization of models?
  - facilitate experimental-theoretical dialogue

- How background-free can we actually be for low mass states? (displaced)
- What are the biggest outstanding loopholes in prompt searches?
- How valuable are summary plots? What others to make?
- For long-lived particles, what are useful parameterizations in presenting results?
