

# Cryogenic safety - HSE workshop

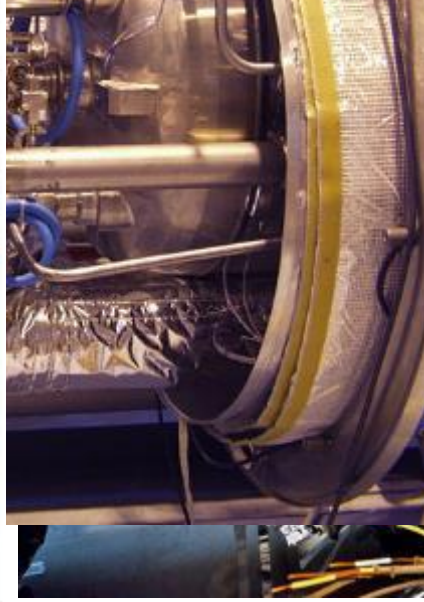

## CERN 21<sup>st</sup> to 23<sup>rd</sup> September

Simon Baird

# Safety @ CERN

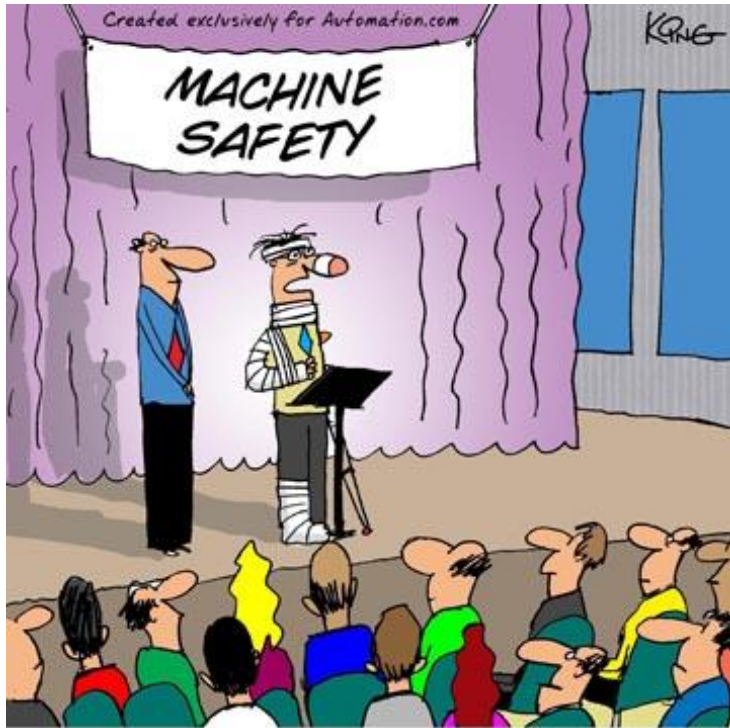

- Safety policy is under the responsibility of the DG and aims to
  - Ensure the best possible protection of all persons on site and in the vicinity
  - Limit the Organisation's impact on the environment
  - Guarantee best practice in matters of Safety
- CERN establishes safety rules applicable to the Organisation's activities, taking into account Host State and EU regulations
- HSE is CERN's centre of competence in matters of Safety and, as such
  - Ensures implementation of the CERN Safety Policy
  - Provides support to all parts of the Organisation in matters of Safety
  - Establishes and updates CERN Safety rules as required
  - Provides a fire and rescue service
  - Provides a medical service for occupational health
  - Grants authorisations for the operation of installations with major safety implications

- Cryogenics at CERN is not just LHC
  - Many smaller users
  - AD...

Have an interesting workshop

*“Mr. Barnes is here again to speak about machine safety. Unfortunately, I missed his first speech.”*
