

# **ATLAS workshop on tau lepton physics 2009**

**Wednesday, 15 April 2009 - Friday, 17 April 2009**

**Niels Bohr Institute**

## **Scientific Programme**

The main topics of the workshop are:

Tau trigger (performance, commissioning 2008, trigger menu, trigger efficiency)

Commissioning (Cosmics and First beam experience)

Performance and Algorithms (status & new developments in Release 15)

Physics with  $10\text{-}100\text{ pb}^{-1}$  (Analyses overview, Pileup, efficiencies, background estimation from data, systematics measurement)

Discoveries with tau (New post-CSC studies, possible Tevatron experience)
