24/06/2016	Discussion about the possibility of moving the BPM in Q1-Q2A towards the IP	WP3
01/07/2016	Update on CE re-design (S. Maridor, P. Fessia) Overview of activation of LHC elements to be disassembled (C. Adorisio) Racks for collimation between D1-Q7 (I. Zurbarano)	integration C. Adorisio RP
08/07/2016	update on CE re-design	integration
15/07/2016	update on CE re-design	integration
22/07/2016	D11T: integration of QDS and QH power supply D11T : other equipment integration TCLD integration point 7 RRR: summary of what it stays and what goes	integration-WP11 integration-WP11 integration-WP11 integration
29/07/2016	Civil Engineering tolerance Civil Engineering feedback about the shape of the safety exit maks integration point 8	SMB SMB WP8-integration
05/08/2016	cancelled	
12/08/2016	Machine Layout of P2 and P6 TCLD integration point 2 updated excel file for the equipment in underground	WP11-integration integration
19/08/2016	LSS4: hollow lenses and other options new optics after project re-baselining Point 4 infrastructures: transport design study following vist with RF and CRG Point 4 infrastructures: CV design study following vist with RF and CRG	integration/RF/collimation/BI WP2/integration Transport team CV team
26/08/2016		
02/09/2016	new optics after project re-baselining Point 4: scryogenics results for study of upgrade at point 4	WP2/integration WP9
09/09/2016	cancelled	
16/09/2016	LSS4: hollow lenses and other options	integration/RF/collimation/BI
23/09/2016
