

## Session Program

22-27 Sept 2016

## Hard Probe 2016

### ***Parallel Session I: Hard Probes in $p+p$ and $p+A$ Collisions (I)***

East Lake International Conference Center  
Donghu Road 142, Wuchang District, Wuhan, Hubei, China

# Saturday 24 September

08:30

## Parallel Session I: Hard Probes in p+p and p+A Collisions (I)

**Session** | **Location:** East Lake International Convention Center, Shi-Yan Hall | **Convener:** David d'Enterria

08:30–08:50

**ALICE measurements of heavy-flavour production as a function of multiplicity and angular correlations in pp and p--Pb collisions at the LHC**

**Speaker**

Grazia Luparello

08:50–09:10

**Measurement of the nuclear modification factor for high-pT charged hadrons in pPb collisions with the ATLAS detector**

**Speaker**

Petr Balek

09:10–09:30

**Predictions for \$p+\$Pb Collisions at  $\sqrt{s_{NN}} = 5$  TeV: Comparison With Data**

**Speaker**

Ramona Vogt

09:30–09:50

**Gluon bremsstrahlung and flow assymetry in pA collisions**

**Speaker**

Peter Levai

09:50–10:10

**Jet energy loss in small systems with finite-size effects and running coupling**

**Speaker**

Chanwook Park

10:10
