

## Session Program

22-27 Sept 2016

## Hard Probe 2016

### ***Parallel Session VI: High $p_T$ hadron suppression in A+A (II)***

East Lake International Conference Center  
Donghu Road 142, Wuchang District, Wuhan, Hubei, China

# Sunday 25 September

10:40

## Parallel Session VI: High pT hadron suppression in A+A (II)

**Session** |**Location:** East Lake International Conference Center, Wuhan Hall, Donghu Road 142, Wuchang District, Wuhan, Hubei, China |**Convener:** William Horowitz

10:40-11:00

### Strangeness production and nuclear modification at LHC energies

**Speaker**

Oliver Busch

11:00-11:20

### Measurement of azimuthal flow of soft and high-pT charged particles in 5.02 TeV Pb+Pb collisions with the ATLAS detector

**Speaker**

Klaudia Burka

11:20-11:40

### Beyond the Poisson Approximation: n Gluon Radiation in QGP

**Speaker**

Andriniaina Rasoanaivo

11:40-12:00

### Medium modification of jet charge in heavy-ion collisions

**Speaker**

Shi-Yong Chen

12:00-12:20

### The x and scale dependence of the transport coefficient $\hat{q}$

**Speaker**

Abhijit Majumder

12:20
