

Technical Stop 25/05/09

EN-MEF-ABA

Due to the problem with the injection Septum in the Booster, this technical stop has been advanced to Tuesday and Wednesday the 19th and 20th May!

LINAC 2 – rev. 18/05

R.Scrivens updates + Cristiano Mastrostefano

In summary, all the essential work can be advanced. 2 points will either not be done, or will be VERY difficult to fit in. Situation for them to be revisited on Wednesday. Alone they would not justify keeping the technical stop on the 25th, but could be completed at a later date.

Blue – Items can be done Monday to Wednesday.

Red – Items not possible, or to be seen after preparation work has started.

Pré-injecteur:

- -Remplacement connecteur LI-MTR02, 1 heure, Franco Lenardon. - **Will be done Monday (18/05).**
- -Entretien cage faraday, 1 heure, Mastrostefano.- **Will be done Tuesday or Wednesday (20/05)**

Tunnel LINAC 2 (avec procédure <https://edms.cern.ch/document/984989>)

- Remplacement LT DVT 20, 3 heures, Antony Newborough. - **Not possible up to Wednesday (included).- Situation to be rediscussed on Wednesday afternoon. Possible installation on Friday if stop is longer.**
- Inspection du système de refroidissement, 1/2 heure, Sebastien Bertolo.- **Will be done Monday (18/05).**

Local technique et installations d'eau:

- Arrêt de la station de refroidissement du 234 pour nettoyage des tours (aussi arret LINAC3+LEIR) S. Deleval, EN/CV.- **1st Treatment, then 24hrs wait, then clean on Wednesday (20/05).**
- Intervention électrique sur station FTEF-216 "cooling structures" (pour test alarme et ajout relai manque tension) 3 heures, S. Deleval, EN/CV.- **Checking if all parts are available in the storage.**
- Inspection complète de la ventilation et campagne de changement des filtres, S. Deleval, EN/CV.- **Will be started Monday (18/05).**
- Coupure réseau UPS répartiteur EOD1*81 et EOD2*81, 3 heures, Nuno Dos Santos.(a confirmer pour autorisation de travaux à Mr Nuno Dos Santos).- **Cabling work is being accelerated.- Not clear the stop, reconnection, and restart can be completed by the end of Wednesday, in addition, restarting at ~17:00 on Wednesday would not be ideal. Situation to be rechecked on Wednesday.- Consequence if not done: Wait for next stop to make UPS power cut.**

PS Booster (1) – rev. 18/05

David MCFARLANE

There will also be interventions on the prime water cooling stations outside the tunnel, the details of which are not yet known.
X. Genillon TE/EPC	162019	Tuesday		Motor Generator MPS. Will make visual inspection of the brushes and change them if required.
R. Brown EN/MEF	163071	Wednesday 1hour	<ul style="list-style-type: none"> • R. Brown 	Make polarity measurements on the following magnets. Purpose, to update the documentation to avoid future polarity errors. Coordinated with S. Mataguez in the CCC. BSW57 in SS53, SS59, SS61, SS67. QKE16CT25 in SS25 QKE16CT73 in SS73 QKE16 in SS05, SS25 QSE in SS29, SS87
R. Steerenberg Operations BE/OP	164518	1 hour	A. Newborough+?	To access the PS to change the polarity of BTP.DVT50.

PS (3) – rev. 18/05

Ray BROWN

- **PS Grass Cutting. GS/SEM**
 - There will be access to the green areas above the PS ring for grass cutting. This will start at 08:00 Tuesday, the gates are already open.
 - CCC to search and close Wednesday afternoon.
 - Requester Y.G. Chevret.
- **Alexandre Habart EN/EL**
 - Power cut in the “Centre d’Anneau” buildings 353, 357, 367, 368 and 151. This is expected to be for the whole of Tuesday afternoon and concerns the distribution board ERD1*PSC and EZD11*SHC. The users of these buildings have been informed and no objections have been received. Lighting and sockets will not be affected.

Quentin King TE/EPC

- Monday including MPS tests.
- Main Power Supply software upgrade for the FGC and replacement of the operational FGC to resolve a temperature reading fault. This is only a 10 minute process to make the upgrade and reload all the active functions, the same to return to the existing software in the event of a problem.
- Requester R.Steerenberg and Q.King

EAST Hall

Lau Gatignon

<u>Request made by:</u>	<u>Phone number</u>	<u>Duration</u>	<u>Names of people requiring access</u>	<u>Work to be done</u>
Lau Gatignon	163554	3 hours		<p>Take the position (in particular the height) of the shuttle of IRRAD as a reference point at the downstream end. Upstream ZT7.BHZ01 is the reference.</p> <p>Check the alignment of ZT7.MTV01 ZT7.MSC01 ZT7.MSC (detector of Maurice Glaser) ZT7.MTV03 (idem)Mark reference points on the floor and indicate the beam height on the wall.</p> <p>Maurice will fix the elements on the floor (with help from RP).RP will check for abnormal radiation levels on Z77.QFO1 (in addition to the normal checks for personnel protection).</p> <p>Maurice will prepare films on all the elements to check the beam position after the intervention.</p>
