

Restricted Visibility of WebSites from the Technical Network

P.Charrue on behalf of the
CNIC working group

Details

- As agreed on the last CNIC meeting, the **visibility of centrally hosted web-sites** (CERN.CH\xxx) from the Technical Network (TN) will be restricted to a well-defined set of essential web-sites.
- This will become active on **Monday, June 22nd at 9:00**.
- Please note that non-central web-sites already visible from the TN (e.g. EDMS, CS-CCR-WWW1, CMF) are not affected.
- In addition, **all web-sites will still be visible from the General Purpose Network** (GPN), e.g. from GPN consoles in the CCC.
- If you encounter a missing web-site which you believe has a justified need for operations to be visible, please inform **Technical-NetworkAdministrator@cern.ch**
