

RAL Tier-1 MoU Commitment

- CPU: Sufficient capacity already operational to meet MoU commitment.
- TAPE: Policy to “buy on demand”. However most media already in place and last deliver expected this month.
- Disk: sufficient capacity already in place in CASTOR to meet MoU commitments.
 - Plan to bring new CEPH System (called ECHO) into operation over next 12 months. In direct discussion with experiments - but sufficient resource to enable parallel running through 2016.
