

- SWAN: Service for Web-Based Analysis in the Cloud
 - Pilot service available
 - Analysis with only a web browser
 - ROOT integrated with Jupyter
 - CVMFS for software distribution
 - Cloud storage: EOS mass storage + CERNBox synchronisation
- Ongoing & future work:
 - Incorporate user feedback
 - Facilitate use of experiment software
 - Enrich CVMFS with new (useful) packages
 - Improve experience with storage: sharing
 - Exploit external resources (e.g. Spark clusters)
