

HiggsHunters - a citizen science project for ATLAS

Andy Haas (NYU) and Alan Barr (Oxford), on behalf of the ATLAS Collaboration

- Citizen Science allows people to *participate* in scientific studies
- HiggsHunters is an ATLAS project on the Zooniverse web-platform
- Users click on images of ATLAS events and identify displaced vertices
- Over 30,000 participants and 1.2 million clicks so far

Number of sessions from each country

- Social-media and other connections
- Broad demographics
- Extending partnerships with schools
